

Welcome to a better internet
where **your data and email**
belong to you, not tech companies,
governments or hackers.

Zimbra introduces a new, modern, responsive end-user experience built on Zimbra's dependable server infrastructure for the security, privacy and data sovereignty Zimbra customers expect. Unlike competitors with closed platforms, Zimbra is flexible and extensible, so small businesses, enterprises, governments and service providers can integrate with the 3rd party collaboration services they use today—Slack, Zoom,

Dropbox and more. The new Zimlet framework lets users customize for geographic or industry specific requirements. Current Zimbra users can easily upgrade or consult our Professional Services team. And just like

always, Zimbra can be deployed on-premises, in public or private clouds or as a hosted service from Zimbra service providers in your own country.

KEY TALKING POINTS

Modern, Responsive UI: Seamless experience on mobile, table and desktops. Consistent Zimbra interface across all devices at all times.

Integrations: Out-of-the-box integrations with 3rd party collaboration tools you use today Slack, Zoom and Dropbox-with many more on the way.

Classic UI: Easily toggle between Modern and Classic UIs for easy transition to and adoption of Zimbra.

Extensibility: New Zimlet framework provides extensibility to meet geographic or industry specific requirements. Zimlets are now easier to build and deploy.

Zimbra Server Infrastructure: Built on Zimbra's dependable server infrastructure for the security, privacy and data sovereignty Zimbra customers have come to expect.

Easy Upgrade: No Migration Needed. Current Zimbra users can easily self-upgrade or our Professional Services team is there for you.

OTHER KEY BENEFITS:

- Lowest TCO in the industry
- Open Source
- Secure, Private and Compliant by design
- Enables Data Sovereignty
- Customizable
- Accessible on any device, anywhere
- Scales from 10 users to 10M users
- Cloud or on-premises in your data center

3RD PARTY INTEGRATIONS = EXTENSIBILITY

Zimbra is designed for extensibility and features best-in-class, out-of-the-box integrations with Slack, Dropbox and Zoom, with many more integrations underway.

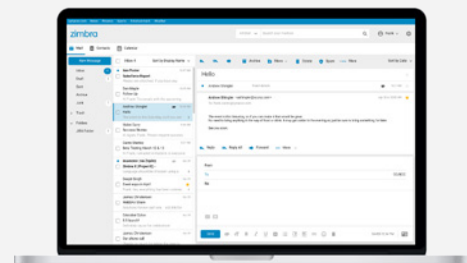

Zimbra is fully committed to creating a collaboration ecosystem that allows small businesses, enterprises and other organizations to utilize services they use day-to-day instead of being forced to use or pay for services they don't use.

Break free from the closed systems of Microsoft and Google and use the apps that you have already invested in.

ZIMBRA SERVER INFRASTRUCTURE = SECURITY, PRIVACY & DATA SOVEREIGNTY

Zimbra runs on Zimbra's dependable server infrastructure, providing the security, privacy and data sovereignty Zimbra customers have come to expect, and in many cases, require.

THE NEXT GENERATION EMAIL & COLLABORATION PLATFORM

State-of-the-art Email and Collaboration for SMB, Enterprises, Governments and others who want a reliable, secure, intuitive solution that increases engagement and productivity and is highly extensible to fit into any desired collaboration app suite.

Zimbra Cloud is a leap forward in email:

- Next generation, truly stateless architecture
- With reseller options, targeting small to medium businesses - new revenue opportunity for Service Providers!
- Smart integrations with commonly used third party apps like Zoom, Slack, Dropbox, Google Drive and more
